Software engineer with six years of Laravel experience. As project lead, I run web engineering for a multi-tenant property-management SaaS in the UAE: a ~300,000-line API and nine web applications. I specialise in modernising large codebases, running them on Docker and AWS, and making every release reviewable and safe.

Experience

Project Lead, ISKAAN, Dubai

Sep 2025 – present

- Lead up to 6 developers within a cross-functional team of up to 12; own code review and releases for 9 repositories.
- Led the migration of the core API from Lumen 10 to Laravel 13 / PHP 8.5, and the admin portal to Angular 22.
- Containerised the platform and moved production to AWS ECS with ECR, CodeBuild and Secrets Manager.
- Built Claude Code skills that review every pull request for a ticket and prepare deployments end to end.
- Technical lead for the finance and accounting module and the Mollak (Dubai Land Department) integration.

Full Stack Developer, ISKAAN, Dubai

Sep 2022 – Aug 2025

- 1,170+ commits to the core Laravel API and its Angular portals, starting with the notices module.
- Built a resident-services platform from scratch (Laravel API, Angular apps); wrote about 90% of the API.
- Mentored several junior developers through code review and day-to-day support.
- Introduced Larastan, Rector and Pint; built a Docker dev environment and blue-green disaster-recovery deploys.

Full Stack Developer (part-time), ScanTitan, remote

Oct 2020 – Oct 2022

- Subscriptions, referrals and PDF scan reports for a cyber-exposure scanning SaaS (Laravel, Vue).
- Multi-channel notifications (email, SMS, Teams, Slack, push), penetration-test fixes and API performance work.

Skills

Backend	Laravel, PHP 8.5, MySQL, REST APIs, Pest
Frontend	Angular, Vue, Blade, Tailwind CSS
Infrastructure	Docker, AWS (ECS, ECR, CodeBuild), DigitalOcean, Azure DevOps, Laravel Cloud, Laravel Nightwatch
Practice	Code review, release management, Larastan, Rector, Claude Code, MCP

Education and languages

BSc Computer Engineering

Ankara University, 2017 – 2022

Arabic (native), English (full professional), Turkish (intermediate)

Side projects

Masroofi: bilingual finance app, Laravel 13 and Hotwire Native.

Game engine: 2D engine and editor in Java with OpenGL and ECS.
